THE MARKET ADMINISTRATOR'S BULLETIN

Ohio Valley Marketing Area
Federal Order No. 33

Eastern Ohio Western-Pennsylvania Marketing Area
Federal Order No. 36

VOL. XXII-NO. 12

MARVIN A. BAUMER, Market Administrator

DECEMBER 1991

Baumer Named to Administer Two Additional Federal Orders

Marvin A. Baumer, in addition to his duties as market administrator of the Southern Michigan and Upper Peninsula milk marketing orders, has been designated to administer the Ohio Valley and Eastern Ohio-Western Pennsylvania orders. The announcement was made by

Marvin A. Baumer

W.H. Blanchard, director of the Dairy Division, AMS, U.S. Department of Agriculture, effective November 3, 1991.

He succeeds C. Mack Endsley, who after a long career in the federal order system, retired on November 2.

While the Southern Michigan office will remain in operation as a suboffice, Marv Baumer will relocate to the Cleveland area, and his

principal office (Middleburg Heights) will be located there. The office in Columbus, Ohio, is also designated a suboffice.

Baumer joined the federal order program in 1960 as an auditor in Akron, Ohio. From 1961 through 1972, he served as an auditor in the Youngstown and Pittsburgh offices. In 1972, he was transferred to the Cleveland office and put in charge of converting that order's operations to data processing. He was named assistant administrator in 1976. In 1982, he was designated market administrator of the Southern Michigan and Upper Peninsula orders.

Baumer is a native of Minster, Ohio, and holds a Bachelor of Science degree in Agricultural Economics. He and his wife, Connie, have five grown children, the youngest of whom is a sophomore at Michigan State University. The Baumer's also have five grandchildren.

Altered Pricing Bases Proposed For Milk For Powder In Three Milk Orders

The U.S. Department of Agriculture is proposing to change the bases for pricing milk used to make nonfat dried milk in one Western and two Eastern federal milk marketing orders.

Daniel D. Haley, administrator of USDA's Agricultural Marketing Service, said that in the New England, Middle Atlantic and Pacific Northwest orders, prices paid farmers for milk used for non-fat dried milk no longer would be based on the so-called "M-W price," which is the price paid for Grade B (manufacturing grade) milk in Minnesota and Wisconsin.

In the Eastern orders, the price during a given month would be based on the average market price paid in the "Central states" for non-fat powder minus a 12.5 cents per pound "make" allowance, i.e., an allowance for the cost of "making" milk into powder. Factors to account for the value of the milk as it leaves the farm also would be included in the formula.

(The Central states are Kansas, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, North Dakota, South Dakota and Wisconsin. States in the New England order are Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont. States in the Middle Atlantic order are the District of Columbia, Maryland, New Jersey, Pennsylvania and Virginia.)

The formula for the Pacific Northwest order (affecting Washington, Oregon and part of Idaho) would differ only in that its base would be taken from the average price of nonfat dry milk in the "Western Area," i.e., Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

The new prices would be termed "Class III-A," a subcategory of the traditional Class III price -- the lowest priced milk in the milk marketing order system, which for years was based on the M-W price, Haley said.

Because milk priced under the M-W is destined mostly for hard cheese, and because the demand for cheese exceeds that for milk powder,

the M-W price (which the processor of dried milk must pay farmers) is higher than the price processors can get for the milk powder. Thus dried milk processors have lost money. The new formula would allow them to pay less for the milk they use, allowing them to stay in business, thereby providing an outlet for seasonally excess milk, Haley said. In the affected milk orders, cheese plant capacity is inadequate to use that milk, and powder is a significant outlet for it, Haley said.

In milk orders with significant cheesemaking capacity, surplus milk would generally be directed to cheesemaking, so the M-W price would continue to be appropriate there, said Haley.

Although milk cooperatives proposing a change from the M-W price basis at a USDA hearing in July requested the change to include milk used for butter as well as powder, the lowering in 1990 of minimum prices paid for milkfat in whole milk already addressed the problem of surplus cream used to make butter, Haley said.

Because the surplus milk pricing issue is critical in the three affected milk orders, USDA is abbreviating rulemaking on this proposal, honoring their proponents' requests to do so.

Details of the proposals will be published as a "tentative decision" in the Dec. 19 Federal Register. This would allow USDA to try out the changes before issuing a final decision on them. As in all amendments to marketing orders, the changes would not become final until approved in a referendum of producers they affect.

Copies of the tentative decision are available from the Dairy Division, Marketing Order Formulation Branch, AMS, USDA, Rm. 2971-S, P.O. Box 96456, Washington, D.C. 20090-6456, tel. (202) 720-6273, or from any milk market administrator's office.

Comments, in six copies and postmarked by Jan. 10, should be sent to the Hearing Clerk, Rm. 1081-S, USDA, Washington, D.C. 20250

Federal milk marketing orders set minimum prices paid farmers, and assure that milk users have adequate supplies of the milk they use.

FEDERAL ORDER 33 MARKET SUMMARY FOR NOVEMBER 1991

Gross Class I utilization averaged 4,509,124 pounds per day during November 1991. On a daily basis this was an increase of 2.1% from the previous month and .5% more than November 1990.^{1/}

The November 1991 Class I utilization of producer milk totaled 132,986,371 pounds or 60.9% of the reported producer receipts. This utilization percentage is 1.0% more than last month and 3.4% more than November 1990.^{1/}

The average butterfat test for gross Class I utilization was 2.0% for November 1991.

Receipts from 3,271 producers by 26 pool handlers regulated by Order No. 33 averaged 7,275,232 pounds daily for November 1991. On a daily basis this was .3% more than last month and 5.5% less than November 1990.^{1/}

Producers supplying the market decreased by 40 from the October 1991 total and decreased by 421 from November 1990. The daily average producer receipts per farm of 2,224 pounds were 34 more than the previous month. On a daily basis this is 139 pounds more than November 1990.^{1/}

The November 1991 Class I price was \$14.06 per hundredweight for 3.5% milk delivered to pool plants in Zone 3. This was 52 cents more than the October 1991 Class I price and 48 cents less than the November 1990 price. Prices for Class I milk in parts of the marketing area other than Zone 3 reflect the specified location adjustment of minus 24 cents in Zone 1, minus 14 cents in Zone 2, plus 7 cents in Zone 4 and plus 15 cents in Zone 5.

The Class II price for November 1991 was \$12.96. This was 59 cents more than the October 1991 Class II price and \$1.68 more than the November 1990 Class II price.

The Class III price of \$12.48 for November 1991 was 2 cents less than the previous month and \$2.23 more than the November 1990 Class III price.

The December 1991 Class I price will be \$14.54 for 3.5% milk.

^{1/} Comparisons to previous periods are magnified due to changes in the handlers included in the pool.

FEDERAL ORDER 36 MARKET SUMMARY FOR NOVEMBER 1991

Gross Class I utilization averaged 5,433,585 pounds per day during November 1991. On a daily basis this was an increase of 1.3% from the previous month and 3.6% more than November 1990.^{1/}

The November 1991 Class I utilization of producer milk totaled 162,798,669 pounds or 59.5% of the reported producer receipts. This utilization percentage is 0.8% more than last month and 1.5% less than November 1990.^{1/}

The average butterfat test for gross Class I utilization was 2.1% for November 1991.

Receipts from 4,597 producers by 32 pool handlers regulated by Order No. 36 averaged 9,111,437 pounds daily for November 1991. On a daily basis this was 0.2% less than last month and 6.9% more than November 1990.^{1/}

Producers supplying the market decreased by 46 from the October 1991 total and decreased by 2 from November 1990. The daily average producer receipts per farm of 1,982 pounds were 15 more than the previous month. On a daily basis this is 129 pounds more than November 1990.^{1/}

The November 1991 Class I price was \$14.02 per hundredweight for 3.5% milk delivered to pool plants. This was 52 cents more than the October 1991 Class I price and 48 cents less than the November 1990 price.

The Class II price for November 1991 was \$12.96. This was 59 cents more than the October 1991 Class II price and \$1.68 more than the November 1990 Class II price.

The Class III price of \$12.48 for November 1991 was 2 cents less than last month and \$2.23 more than the November 1990 Class III price.

The December 1991 Class I price will be \$14.50 for 3.5% milk.

^{1/} Comparisons to previous periods are magnified due to changes in the handlers included in the pool.
